Thomas Hardy

Front End Developer

Portsmouth, Hampshire, UK • +447876521322 • tj.hardy77@yahoo.co.uk •
github.com/ThomasHardy98 • www.thomashardydev.com

Front end developer with 3 years of experience and knowledge using HTML5, CSS, JavaScript, ReactJS and Typescript, to help organisations improve the users experience within their applications.

With exposure to the MERN stack inside personal projects and hands-on experience providing functionality and designs for businesses within Agriculture, I am able to support stakeholders and colleagues to provide numerous business improvements through technology. I'm currently in the process of transitioning to a full time react developer, as my previous role didn't entail any react work commercially, so all my react experience comes from personal projects.

Relevant Work Experience

Proagrica, Portsmouth, UK   2020 - Present
Front End Developer

- Built responsive web applications using HTML5, JavaScript and CSS
- Was involved in the full process of feature implementation, from blueprinting the feature in software such as Axure and AdobeXD, showcasing the feature and then implementing the feature after approval from key stakeholders.
- Took part in the graduate scheme where I led a group of graduates in mocking up a new piece of software that would help the business increase care hours uptake.

Education

Bournemouth University, Bournemouth, UK   2016 - 2019
BSc Games Programming - First Class Honours Degree

Skills

Libraries: ReactJS, NodeJS (Beginner), ExpressJS (Beginner),
Languages: Javascript, Typescript

Current Personal Projects

Booking Project: I am currently working on improving my MERN stack knowledge by working on a booking project. The aim of this project is to have an SPA be accessible for businesses wanting to receive bookings, it will then connect to my own REST API built with NodeJS (ExpressJS), that can then talk to MongoDB and the mobile app built with React Native where customers will be able to send booking requests.
